Summary

A Front-End Developer with over 10 years of experience able to create cutting-edge websites and applications for high-profile clients with challenging demands and visions. Passionate about going the extra mile to ensure the customer is unquestionably satisfied with the product or service provided. With an emphasis on scalable and well-documented code, I look forward to working collaboratively as well as spearheading independent projects.

Education

Computer Science(BS)

Chiba University • Chiba, Japan
03/2012
BS in Computer Science

Experience

Web Developer (Freelance)

Upwork • Los Angeles, California
04/2022 - Present

- Participated in upgrading a vue.js project to migrate from Vue2 to Vue3(used Quasar framework).
- Assisted Element-UI-based Vue.js project to have modern responsive UI and reusable components with experience in UI development and code-refactoring.

Front end Developer(FullTime, Contract)

SuzukiMedia • Los Angeles, California
02/2021 - 04/2022

- Developed and maintained a Vue. js-based social media website with Element-UI.
- Used Vuex as middleware to manipulate the data type and handle multiple actions.
- Participated in E2E test with cypress to verify the reliability of the project we developed.
- Collaborated with teammates to make the website lightweight and fast with code-refactoring and fixing issues on the project.

Front end Developer(FullTime, Contract)

Verizon • Ridgewood, New Jersey
09/2020 - 02/2021

- Worked with business stakeholders and project managers to manage timelines and client expectations.
- Assisted in backend integration and coded HTML/CSS mockups, test, and verify projects through the development process.
- Collaborated with teammates in maintaining an existing Next.js project to have modern UI and reusable components, and to meet the best practice.

Front end Developer(FullTime, Permanent)

SweepInspect • Louisville, Kentucky
02/2016 - 09/2020

- Developed high-performance customer-facing eCommerce application using React.js, Redux-saga, React Hooks, React-Router, Javascript/Typescript, HTML5, CSS3, and Bootstrap.

- Implemented CSS Box Model and styled web pages using SASS and effectively used mixins, functions, custom grid systems, grid-area concepts, and flexbox for fluid-responsive application.
- Experienced in all phases of SDLC like Requirement Analysis, Implementation, and Maintenance and extensive experience with Agile and SCRUM.
- Extensively used Github, and Source Tree for all of the distributed version control and source code management(SCM).
- Worked closely with the Backend team to ensure smooth deployments by configuring different builds and test scripts for the CI/CD process laid.
- Used Google Analytics to capture user metrics to improve customer experience with digital analytics.

UI Developer (FullTime, Contract)

SoftServe • Toronto, Ontario, Canada
10/2014 - 02/2016

- Involved in developing web pages of an eCommerce project with Vue.js and worked in all the modules of the application and utilized CSS/BootStrap to make every page attractive and cool.
- Used jQuery core library functions for the logical implementation part on the client side.
- Improved site speed by optimizing images and reducing HTTP requests when possible.
- Collaborated with the team to design new features for our web application and mobile app, made lots of HTML/CSS mockups, and ensured that all code is well documented, reusable, efficient, and followed best practices.

PHP Developer (FullTime, Permanent)

Pactera Technology Japan co.ltd • Tokyo, Tokyo, Japan
05/2012 - 10/2014

- Upgraded PHP CodeIgniter and other framework applications with PHP/MySQL skills.
- Developed an in-house CRM using LAMP to allow for easier personalization for company use, eventually leading to a 12% reduction in annual costs.
- Utilized GIT source control for projects that required extra functionality beyond standard WordPress features or those provided by popular and trusted plugins
