John Sato

johnsato0401@gmail.com / 3602070801 / Los Angeles, Califonia

Summary

Front-End Engineer with over 10 years of experience able to create cutting-edge websites and applications for high-profile clients with challenging demands and visions. Passionate about going the extra mile to ensure the customer is unquestionably satisfied with the product or service provided. With an emphasis on scalable and well-documented code, I look forward to working collaboratively as well as spearheading independent projects.

Experience

Front End Developer

Upwork • Los Angeles, Califonia

03/2022 - Present

- Participated in upgrading a social media project to migrate from Vue2 to Vue3(used Quasar framework).
- Assisted Element-UI-based Vue.js project to have modern responsive UI and reusable components with experience.
- Participated in the maintenance of a NextJS eCommerce project to upgrade the UI and add 2 kinds of D3.js Charts to make all the data easy to understand at a look.

Front End Engineer (Full-time)

SuzukiMedia • Los Angeles, Califonia

02/2021 - 03/2022

- Developed and maintained a React-based social media website with Material-UI.
- Used Redux as middleware to manipulate the data type and handle multiple actions.
- Experienced E2E test with cypress to verify the reliability of the project we developed.
- Collaborated with teammates to make the website lightweight and fast with code-refactoring and fixing issues on the project.

Front End Developer (Contract)

Verizon • Ridgewood, New Jersey

11/2019 - 02/2021

- Worked with business stakeholders and project managers to manage timelines and client expectations.
- Assisted in backend integration and coded HTML/CSS mockups, test, and verify projects through the development process.
- Collaborated with teammates in maintaining an existing React project to have modern UI and reusable components, and to meet the best practice.

Front End Engineer (Full-time)

SweepInspect • Louisville, Kentucky

08/2015 - 11/2019

- Developed high-performance customer-facing eCommerce application using React.js, Redux-saga, React Hooks, React-Router, Javascript/Typescript, HTML5, CSS3, and Bootstrap.

- Implemented CSS Box Model and styled web pages using SASS and effectively used mixins, functions, custom grid systems, grid-area concepts, and flexbox for fluid-responsive application.
- Experienced in all phases of SDLC like Requirement Analysis, Implementation, and Maintenance and extensive experience with Agile and SCRUM.
- Extensively used Github, and Source Tree for all of the distributed version control and source code management(SCM).
- Worked closely with the Backend team to ensure smooth deployments by configuring different builds and test scripts for the CI/CD process laid.
- Used Google Analytics to capture user metrics to improve customer experience with digital analytics.

UI Developer (Contract)

SoftServe • Toronto, Ontario, Canada
10/2014 - 08/2015

- Involved in developing web pages of an eCommerce project with Vue.js and worked in all the modules of the application and utilized CSS/BootStrap to make every page attractive and cool.
- Used jQuery core library functions for the logical implementation part on the client side. Improved site speed by optimizing images and reducing HTTP requests when possible.
- Collaborated with the team to design new features for our web application and mobile app, made lots of HTML/CSS mockups, and ensured that all code is well documented, reusable, efficient, and followed best practices.

Web Developer (Full-time)

Pactera Technology International Ltd • Tokyo, Tokyo, Japan
04/2012 - 10/2014

- Upgraded PHP CodeIgniter and other framework applications with PHP/MySQL skills.
- Developed an in-house CRM using LAMP to allow for easier personalization for company use, eventually leading to a 12% reduction in annual costs.
- Utilized GIT source control for projects that required extra functionality beyond standard WordPress features or those provided by popular and trusted plugins.
